# MILLENNIUM

**Reverse Osmosis Drinking Water System  
With Booster Pump Assembly**

# Enjoy

**Pure and Healthy Water for Drinking, Cooking, Ice Making,  
Coffee & Tea, Food Processing, Pets & Plants...**

**... At Homes,  
Offices, Schools,  
Restaurants, &  
Laboratories.**

***For Every Day Life!***

## How is water contaminated?

Being the world's universal solvent, water constantly dissolves and absorbs contaminants while traveling miles from its source to you.

Contaminants such as heavy metals, salts, dissolved solids, bacteria, and sometimes viruses may find their way in to your water supply.

## How does reverse osmosis work?

With the **New MILLENNIUM** purification technology and breakthrough engineering, it is the finest level of filtration available.

Water pressure forces smaller H<sub>2</sub>O molecules through very tiny semi-permeable membrane pores, which measure 0.0001 microns. This acts as a barrier to contaminants, which are rejected by the membrane and flushed down the drain.

## **New MILLENNIUM** The Pure Water Machine, incorporates a Complete 5-stage water treatment & purification system:

### Stage 1

5 Micron polypropylene sediment pre-filter to extract suspended materials such as sediments, rust, insects, and other particles down to 5 micron.

### Stages 2 & 3

Double carbon block filters to absorb heavy chlorine and chlorine by-products such as chloramine, THM, and TCE. The double carbon briquettes filter out organic matter from water without release of carbon fines. The carbon block prepares water to enter the reverse osmosis element.

### Stage 4

FILMTEC High rejection (95-99%) Thin Film Composite (TFC) RO membrane 75 GPD to reject a wide spectrum of impurities including Total Dissolved Solids (TDS), heavy metals, bacteria, & viruses.

### Stage 5

In-line Coconut Shell GAC filter is used to remove dissolved gases, bad taste and odor from product water. This is the polishing stage before consumption.

Dependable

Convenient

On the Go!

Pure & healthy

**Save time and Money!**

Instead of wasting time and money on buying and carrying safe drinking water, invest in your own pure water machine. The crisp taste of pure water from your **New MILLENNIUM** drinking water system is very economical and costs pennies per gallon.

Connect to ice-maker for clear ice cubes.

At your fingertips, always pure and always fresh.

**New MILLENNIUM The Pure Water Machine is Reliable!**

- Years of trouble free operations.
- Consistent pure water supply.
- Heavy duty construction.
- All 5 stages have gone through rigorous testing and validation/certification by well recognized 3rd party agencies.
- Exceeding industry standards in performance.
- Backed by our exclusive 2-year limited warranty.

Assembled in USA

# Standard Features for *New* MILLENNIUM System

- 75 gpd high rejection TFC Filmtec™ membrane
- Zero noise booster pump assy. 24v w/ transformer
- Automatic high and low pressure switches
- NSF listed 4 gallon United Tanks™ storage tank with stainless steel port & original JG heavy duty ball valve
- Quick connect fittings featuring Safelock™ clips
- With Proflush™ to enhance membrane performance
- Attractive euro-soft extra tall faucet
- Automatic shut-off valve (when tank is full)
- Built-in pressure gauge for performance monitoring
- Color coded tubing for easier installation
- Inlet feed ball valve for easier maintenance
- Complete installation kit and instructions manual
- 2-Year limited warranty
- Made of high quality certified & listed parts and components

## Options for *New* MILLENNIUM Systems

1. In-line UV lamp, 1.0-2.0 Gpm
2. Plastic storage tank, 4 gallon
3. Air-gap, colored faucets, or designer faucets\*
4. Additional stages such as DI, KDF, and/or mineral filters
5. TDS monitor
6. 11 Gallon storage tank
7. Aquatec permeate pump
8. Delivery pump
9. 100 GPD membrane
